

A sustainable, cost effective multiple return method for transporting bulk containers

Plastic separator sheets also called tier, layer, and divider sheets offer an efficient technique for transport of empty cans, containers, and bottles to fillers in the food and beverage industry.

Plastic separator sheets are far more hygienic than cardboard and offer rigidity, memory, and flexibility characteristics which allow the sheet to regain a smooth, clean, flat surface desired for an expanded life and multiple repack turns.

Performance

- Multiple repack turns
- Extremely durable
- Surface memory
- Rigid
- Flexible

Sanitary

- Eliminates foreign matter contamination
- Washable
- Moisture, bacteria, fungus resistant
- Repels Insect, Larvae, Rodents, etc
- FDA approved

Product Cost

- Rapid return on investment
- Eliminates cardboard disposal fees
- Rental programs
- Buy back programs

Environmental Responsibility

- Reusable Sheet
- 100 % recyclable
- Reduces cardboard Waste

Custom manufacturing available utilizing other resin types, size variations, and colors. Fresh Pak Corporation adheres to ISO manufacturing standards.
