

# A sustainable, cost saving, replacement for pallets

Eco-Sheets™ are designed for pallet less material handling and provide solutions that improve the economic and environmental sustainability of transporting products throughout the supply chain. Eco-Sheets™ are being used world wide to ship a growing number of products such as: Food and Beverage, Electronics, Chemicals, and Agriculture.

## Performance

- High Tensile Strength (Pull Resistance)
- High Co-efficient of Friction (Non Slip Surface)
- One way or Multiple use
- Moisture, Bacteria, Fungus, Resistant
- Repels Insect, Larvae, Rodent, etc.
- Hygienic / Odorless / Maintenance Free
- FDA Approved

## Product Cost

- Less expensive than wood pallets 1:10 (US \$\$\$)
- Eliminate wood disposal and maintenance fees
- Eliminates costly wood certification and treatment

## Warehouse & Transportation

- 25% Truck / Container Cube Optimization
- 25% Reduction in Transportation
- Reduces Packaging Weight 1:32 (2lb Slip Sheet vs. 65/lb Pallet)
- Warehouse Optimization 1:80 (500 Slip Sheets vs. 500 Pallets per Cube Meter)

## Environmental Responsibility

- Made with 90% recycled material
- 100% recyclable

Custom manufacturing available utilizing different resin types, size variations, and colors. Fresh Pak Corporation adheres to ISO manufacturing standards.
